

HTML CSS TASKS

Task 1:

1. Title: Online Bookstore Web Page Objective: Create a multi-section HTML webpage for an online bookstore using only basic HTML tags like , ,

Instructions: 1. Page Title & Heading • Set the title as "BookWorld - Your Online Bookstore". • Use

for the main heading. 2. Banner Image & Description • Display a banner image of books. • Write a short paragraph describing the bookstore. 3. Book Categories Table • Create a table with columns: Category, Number of Books, Top Author. • Use table border and proper alignment. 4. Best-Sellers List • Create an ordered list of 5 best-selling books. • Create an unordered list of 5 upcoming book releases. 5. Book Preview • Embed a book preview video using from YouTube. 6. Registration Form • Create a form with: • Name (text) • Email (email input type) • Favorite Genre (dropdown menu) • Comments (textarea) • Submit button 7. Links Section • Add at least 3 hyperlinks to external book-related websites. • Add one link that opens in a new tab

```

```

Output :

Task2:

Lab Task You are to design an “Online Conference Registration Form” with the following requirements: 1. Form Setup • Use

with action, method="post", and enctype="multipart/formdata". • The form should be divided into three sections: 1. Personal Information 2. Account Preferences 3. Payment Details 2. Personal Information • Fields: • Full Name () • Email Address (classic type="text" with a note like “format: user@example.com” instead of HTML5 type="email") • Gender () • Country (with at least 5 countries) • Profile Photo Upload () • All required fields should use the required effect without HTML5 required attribute (instead, write validation instructions and rely on JavaScript). 3. Account Preferences • Fields: • Username () • Password () • Confirm Password () • Interests (list — e.g., Web Development, AI, Cloud, etc.) • Preferred Contact Method (or radio buttons) • Add a textarea for “Special Requirements / Comments”.

4. Payment Details • Fields: • Payment Method (with Credit Card, Debit Card, PayPal) • Card Number () • Expiry Date (Use 2 dropdowns for Month and Year) • CVV (with size=3) • Include a “Terms & Conditions” checkbox. 5. Form Controls • Submit and Reset buttons at the end. • Align form using a table-based layout (since CSS grid/flexbox was not common preHTML5). • Apply inline CSS for basic styling

HTML CODE:

```
<!DOCTYPE html>

<html>

Output:

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:5500/lab2.html'. The page content is a registration form titled 'ONLINE CONFERENCES REGISTRATION FORM'. The form is divided into several sections: 'Personal Information', 'Account Preferences', 'Payment Details', and 'Terms & Conditions'. The 'Personal Information' section includes fields for 'Full Name', 'Email Address', 'Gender' (radio buttons for Male and Female), 'Country' (a dropdown menu), and 'Profile Photo Upload' (a 'Choose File' button). The 'Account Preferences' section includes fields for 'Username', 'Password', and 'Confirm Password', as well as 'Interests' (checkboxes for Web Development, AI, and Cloud), 'Preferred Contact Method' (radio buttons for Email and Phone), and a text area for 'Special Requirements / Comments'. The 'Payment Details' section includes a 'Payment Method' dropdown, 'Card Number', 'Expiry Date' (Month and Year dropdowns), and 'CVV'. At the bottom of the form, there is a checkbox for 'I agree to Terms' and two buttons: 'Submit' and 'Reset'.
